## START

Welcome to issue #165. I was going to try to avoid delays and combined issues this year, but June got very hectic, starting with the UK Games Expo and carrying on for other reasons, such as orders arriving more than a week late and me being too soft to just get on with things. But it is here now. Better late than rushed, and better late than giving people a really short deadline period to the next issue in an attempt to catch up.

Dominion was nominated for this year's Spiel des Jahres (Game of the Year) award in Germany - probably the most prestigious game award there is. Not only was it nominated, it won the main award, much to the surprise of many, who saw it as being too much of a gamer's game to stand a chance. Well deserved, in my opinion.

My first-Saturday-of-the-month games days at home continue, with the next event being on Saturday August 1st. We had eight on the July day, so do let me know if you're thinking of coming, as we do not have unlimited table space.

We continue to watch our DVD series. So far, the character on the cover has not showed up in Smallville, but there's time yet. If Princes Charles has seen this, he may realise that his call to exterminate the invading grey squirrel to give our red squirrels a chance may prove harder than he had imagined.

I was asked to provide some information about Battle!, which has been on the waiting lists for some time. You'll find a one-page summary on page 70. Take a look - it is a game that is well worth investigating. I would really love to get a 12-player game running, but another 6-player game will be better than nothing.

Want some more Agricola? You can order copies of the Z and O decks from the Z-Man Games web site ([www.zmangames.com](http://www.zmangames.com)) while stocks last. The Z deck is the 24 card deck that was included with the first edition of Agricola from Z-Man Games. The O deck is Austrian in origin - so that is O as in Österreich - but these cards are in English.

The price is \$10 each or \$15 for both, including international shipping. Looking further ahead, there will be a full expansion for Agricola coming out at Essen - Agricola, the Moorland Farmer.

BoardGameNews is a useful resource about board games that includes a detailed preview of what is coming up at the Nuremberg and Essen shows. To view the previews you need to be registered, and to do that you support the site with a modest subscription, but it is well worth the cost. [www.boardgamenews.com](http://www.boardgamenews.com) Here is a sample from the Essen preview.

Funkenschlag: Fabrikmanager is from 2F Spiele. Fabrikmanager is not an expansion to Funkenschlag/Power Grid, it is more of a sister design that requires players to adapt the efficiency and money-handling skills needed in Power Grid to a new business scenario.

More Age of Steam expansions are coming from the AOS Team, these being for Holland and Madagascar. Holland requires navigation of the famous polder, while in Madagascar, one of the poorest countries in the world, players have to deal with negative actions rather

than positive ones. If you want to reserve one of the 150 sets that will be available at Essen, email Alban Viard at [ageofsteam09@yahoo.fr](mailto:ageofsteam09@yahoo.fr). The cost will be 25 Euros, and the set must be picked up on the Thursday morning at the Essen show.

Dungeon Twister: Prison is a standalone second edition of Dungeon Twister that also serves as an expansion in its own right as the components and rules will be compatible with the first edition, while also being 85% new. You now get miniatures as standard rather than cardboard stand-ups, together with introductory scenarios and solitaire rules.

Cwali are releasing expansions for Factory Fun, Gipsy Kings and Powerboats.

JKLM are hoping that Ascendancy, Huang Di and Tulipmania will make it out in time for Essen, along with their reprint of Martin Wallace's Tinnens' Trail.

Pillars of the Earth gets a sequel, called World Without End, based once again upon the books of Ken Follett, although it is likely this will only be in German at the show.

Mayfair Games and Phalanx Games will be releasing Rise of Empires from Martin Wallace, which is reputed to breathe new life into the civilization games genre.

R&D Games should be releasing the BoardGameGeek Game, in which players control publishers on the one hand and a team of geeks on the others, the first trying to get their games sold, the second trying to collect sets of games to satisfy their gaming groups.

The joy of computer gaming. Rob suggested a while back that we should investigate playing against each other on-line now that connection speeds make that feasible. The question is, what to play?

He recently mentioned Quake 3 Arena, but setting up the server was not necessarily as simple as it is supposed to be, given that the game was designed for on-line play, and we had some trouble working out how to get our machines to talk to each other. This turned out to be a journey of discovery.

I had not reinstalled the game after my hard disc crash last year, but decided to restore the game folder from the backup as a start. I was surprised to find that it ran from the restored folder, only to have my hopes dashed when it wanted the CD in the drive before it would actually start a game session. And you know why that is a problem. It has been put somewhere safe, of course.

Ah well, with budget prices for older software, that wasn't really a problem. A new copy was purchased and the game was afoot. Connecting on-line was not going to be so easy.

There are several guides available for running your own Quake 3 server, which one of us was going to have to do if we were going to play one-to-one. None of them seemed to provide all the answers, however, and all of them seemed to assume that everything was going to be so easy. Just do this, and everything will work. One reason for this probably lies in the age of the game, which came out before we were all quite so concerned with personal firewalls and wireless routers, which do their best to protect you from the big bad world.

One problem was that neither of us could see any on-line game servers, and until we could do that the chances were we weren't going to connect to a game server the other was running. The guides for playing on-line simply say to choose Multiplayer from the menu and then choose one of the available games from the list you would see. Fixing that turned out to be simple - nobody says that you have to change the server type from Local to Internet

to see any games. It is generally these really simple and theoretically obvious things that let guides down. It is obvious when you know, but if they don't tell you about it, why would you start changing settings they have never mentioned?

With that done I could see and join on-line games, but Rob couldn't unless he turned his firewall off, generally a bad idea. In the end that was relatively simple as well. He told his firewall that Quake 3 was a nice boy and with that done, we were in the same boat. But could we connect for a game? Of course not.

I have never had any formal training in network matters, having picked up what I do know in the course of doing my old job, but one thing I knew was that we would need to specify the public IP address (the Internet equivalent of your telephone number) for connection rather than the private ones on our machines. I now have a page on my web site that tells you what your public IP address is - [www.fwtwr.com/ip.asp](http://www.fwtwr.com/ip.asp). Anyone can use this. All it does is to display your public address, and yours alone, so no harm can come from it. You can't just do this once and note it down, though, because most of us mortals do not have what they call static IP addresses. Every time we connect to the Internet we get given one by our service provider. At least with my router I get a new one each day rather than for each session.

So, one step closer. We now know the address to connect to, although it still doesn't work. The next step is to check out port numbers. The traffic to and from machines is associated with a port number, with standard web pages on one port, file transfers on another, mail on a third, and so on. This lets the machine know what to do with the traffic. The standard security these days is to block all incoming traffic, whatever port it is on. You might wonder how you can view web pages and download stuff if that is the case. This is solved by the system recognising something as a response to your request, and letting that through. Anything initiated from outside is blocked, and this was the likely cause of our remaining problems. Not that this is mentioned in any of the guides I read either.

Armed with this snippet of knowledge, I thought I should check out the settings on my wireless router. Good idea, small problem. I need to log in to it - and do I know what the password is? Well, no, but I eventually found the manual and from the notes was able to get access without having to reset the whole thing. It was still little use, though, because I didn't know what to set up.

Google to the rescue again, searching for "Quake 3 ports". I found all the information I needed, not only which port numbers needed to be open, but by specifying my router model, detailed information on how to set up the router.

So here we are. We can view generally available game servers on the Internet. We worked out how to run a game server on one machine, which is another story entirely, with its own trail of discovery, but not worth talking about here. But could we actually connect? Yes, we could! Which made all the effort worth it.

After all that, the first games we played were not actually against each other, but as team mates against the other side, both of which we lost by one point. But consider that there were two of us, and four of them, so some honour is retained.

We have not, of course, played again since, but we are at least ready and able. I have to catch up on some things first, though, like getting this issue printed. Time to go! ☆

I've been publishing the Board2Pieces cartoons since they first started appearing on the BoardGameNews web site, and should thank Ted Alspach more often for his kind permission to reprint them.

Nicely timed for the news that Dominion won the Spiel des Jahres prize for this year, Intrigue is the first expansion for the game and adds another 25 Kingdom cards to make the game more... intriguing. It contains enough cards to play without the original.

The new Kingdom cards tend to involve more player interaction and are recommended for advanced players. I've got it in stock for £31.50.

Pete Campbell (YAK, 2nd): Yep, it was close. Looking at the map at the end, Michael had a strong north-south and east-west route, whereas mine was centred on York. Probably the decisive difference was Michael’s monopoly on the Harrogate, Skipton and Settle leg. Thanks to everyone for making it a good game and for Keith for running it.

As far as I can tell, this map always seems to give good games. Long may it continue.

CANAL MANIA 1

Is this a good game for postal play?

GAME OVER

1st	Alan Harvey	70
2nd	Don Shailer	68
3rd	John Marsden	63
4th	Stephen Webb	62
5th	Michael Longdin	53

Alan Harvey (1st): I was astonished to read that I had won this game! I had mentally written off my chances several turns ago and assumed I was playing merely to avoid last place.

Now that I have played Canal Mania a number of times face-to-face and once postally I admit that I have some reservations about the game.

- a) My personal preference in postal games like this is for all players to take part in each round, even if it means placing even more provisional orders. I made a cardinal error on the first round by not submitting provisional orders for any cards I drew.
- b) I am not sure that the exchange of engineers works with the present rules. It seems just too easy to steal an engineer from a rival's company.
- c) I remain slightly unconvinced about the starting set of canal contracts. Personally I would prefer a large choice of contracts.

Having said all that, I still enjoyed the game, and would be prepared to take part in a new form of the game on slightly different lines. Many thanks for running it, Keith, and to Don, John, Stephen and Michael for taking part.

John Marsden (3rd): I greatly enjoyed this game. It was an interesting battle of wits, with plenty of decisions to be made. Having not played the game before, I started out rather feeling my way along. As such, I think I missed a few tricks - especially in not placing goods tokens on the map when I could that would have brought me points later.

I'm reasonably happy with the way you organised it, although it might be worth the inevitable lengthening of the game if you only had three players ordering per adjudication - this would reduce the need for quite so much in the way of conditional orders. However, as I say I did enjoy the game and would welcome the opportunity to play again.

Stephen Webb (4th): Not very satisfactory by mail as one simply does not know what build cards are available in the face up pile. This has the potential for considerable conditional ordering as well as removing the ability to estimate the likelihood of a particular type of card being in the next draw. That aside, this is a nice little game that I will happily play face-to-face. Thanks, Keith, and congratulations to Alan.

Alan did very well in the late stages with his goods movement, which brought him back from having written himself off.

As for the ease with which engineers can be taken, I don't think the idea was to make it difficult, the idea was that you had to forego any other action for the first phase to get an engineer that could help you. One engineer is quite capable of providing the same service to every player in a single round, if that is what they want.

The point of the starting contracts is to avoid a situation where some expensive contracts come out early and make it difficult for some players to get their economy moving. I think they were also chosen to increase the chance that your first canal could be expanded on to form a network for goods shipment, rather than starting in an isolated area that would be difficult to develop in this way. You may still not like the mix, of course.

Some quite differing views were expressed on the suitability of Canal Mania for postal play.

Stephen's biggest issue seemed to be about not knowing which build cards were available on his turn. I suspect the answer to that one is to be less concerned with what might be there, and to concentrate instead on what you want.

Orders for taking cards could be phrased along the lines of 'Take Surveyors, then up to 2 Aqueducts, then an even number of locks and stretches'. Some people did provide orders like that. You can extend this approach to say that you'll only take cards if you can get a particular mix, otherwise you'll draw a blind one or build with what you already have.

The other issue must surely be the number of turns you get. I kicked myself for not realising this would be a problem before the game started, and the idea of only doing four players an issue to avoid the same player getting an advantage every time was very much a quick fix. John suggested dropping the number of active players each round to three to reduce the uncertainty for the round, while Alan favours keeping everyone involved, and I have to say I prefer the latter.

We could do something quite different, like changing the playing order each time so that it was in reverse points order, with the current leader going last in the round each time. Tied positions would need to be resolved in some way, and one possibility there would be to reverse the order of those players from one round to the next, so if John went before Alan in one round and they ended the round tied on points, then Alan would go ahead of John the next time.

With four names on the next list, these things could be discussed and agreed upon quickly enough to get another game under way before too long.

RAILWAY RIVALS 2096-B

The swan song for this version of the map.

GAME OVER

1st	Simon Robertson	TGV	293
2nd	Pete Campbell	PLANT	291
3rd	Bob Coull	HOE	217
4th=	Jim Reader	BUM	198
	Colin Sharpe	COLIN	198
6th	Michael Graystone	GREAT	172

Pete Campbell (PLANT, 2nd): I greatly enjoyed my first game of Railway Rivals for over 20 years. It was indeed close. I suspect that where Simon had the edge was that there was less competition on the routes in which he was strong. I'm sure that was a deliberate tactic and I'll try to absorb it into my other games! Thanks to all and for Keith for running it.

Jim Reader (BUM, 4th=): This was one of those horrible games where almost everything I tried went horribly wrong and costed me a fortune in parallel builds. Any attempts to compensate messed up my racing prospects and I think I was dead in the water by turn three. I'm happy not to have finished last, and congratulations to Simon for a close win.

I understand that this map has now been revised, so I guess that any future games will be taking place on the revised map. So thank you, London and Liverpool, we shall see you again in your new life.

RAILWAY RIVALS 2124-I(S)

Let's put the record straight.

ROUND 3

Ireland (South) [12 points for these builds]

Southern Irish Network (SIN) (Pete Campbell, Blue)

32 +12 (towns) +3 (SIN) = 47

PADDY's builds were somewhat mangled by myself last time. He didn't build Z11 - Thurles - W17 - Limerick (which doesn't line up in any case) - he built Z11 - Thurles - V15 - Limerick. I actually drew his line from W15 to Tipperary on my map! The necessary payment adjustments are shown above.

RAILWAY RIVALS 2127-MP

Off into uncharted territory.

ROUND 1

Tony Wilcock has decided not to dip his toes into the Railway Rivals water for now. John Marsden has taken his place and renamed the railway. Thanks, John.

Tony, you said to buy the ferry provided that ... and then I couldn't make sense of the rest. This is one reason I used to ask you for typed orders... I trust it worked out as you wanted.

Malaysian Peninsula [14 points for these builds]

Malaysia's Amazing Railway System (MARS) (John Marsden, Green)

Johor Bahru - V69 - V68 - T67 - Kluang - Segamat - N63, T67 - S68.  
20 +4 (towns) = 24

Butterworth, Alor and Kangar Uber-Engines Travel in Extreme Heat (BAKUTEH)

Kota Bahru - J20 - O18; J20 - J21; K20 - J19. (Jim Reader, Yellow)  
20

Butterworth, Georgetown and Gerik Railway (BUGGER) (Lionel Robbins, Blue)

Johor Bahru - V69 - V67 - Kluang - Muar - S62.  
20 +4 (towns) = 24

Lionel, please do not give the hex reference for a town after giving the name of that town. This leads me to hunt down that hex as the next place you are heading for, and gets very confusing until I realise it is the same place. Name the towns, and give the references for non-town hexes where lines otherwise start, change direction or end.

As for the question of whether the river next to Muar is a standard river crossing or not, the only special river mentioned on the map is the estuary to Singapore, which I take to be the river that runs along the red border line. No other rivers get mentions, and so should be considered standard rivers at +2 to cross.

ROUND 9

Starting positions

Diddy-bot L14-N, President Ford E12-N, Pineapple 196 E8-N (virtual), Squelch M10-N, Bot-i-celli E8-E, Donsbot N5-W.

President Ford announces that he will power down for the next round.

Board effects: Diddy-bot is conveyed to L11, Pineapple 196 is conveyed to B9, Diddy-bot shoots Donsbot {1}, Donsbot shoots Diddy-bot {2}.

9.5

Squelch {790-M3}, Diddy-bot {730-M2}, Pineapple 196 {680-M2}, Bot-i-celli {580-M1}, Donsbot {390-RL}, President Ford {070-RL}.

Board effects: Pineapple 196 is conveyed to C11, Diddy-bot shoots Bot-i-celli {1}.

End of turn effects

Pineapple 196 ceases to be virtual, President Ford powers down.

I'm sure Donsbot realised that moving over the second checkpoint in phase 9.1 was not sufficient to register that checkpoint, but I thought I would mention it just to be sure.

President Ford's details in the table are shaded to show that he is powered down, or to remind me of this at least.

Pineapple 196 spent the round as a virtual robot, which meant he could simply plan his round without having to worry about what the rest of you were up to. In some situations it is almost worth losing a life if you can rejoin as a virtual robot and get a worry-free round.

SPACE BLAST 1

One collision and we're done.

ROUND 17

	Pilot	Colour	Actions	Armour	Chits
1	James White Bob Coull	Green 3 VPs	Turn right, fire rocket	-	1T : 3R 0M : 0B
2	Major Tom Michael Graystone	Orange 4 VPs	Turn right, lay mine, fire rocket	-	1T : 1R 0M : 0B
3	Chewbacca Steve Ham	Blue 2 VPs	Brake, fire rocket	2	0T : 2R 2M : 0B

Major Tom tries to move into the space occupied by James White, who used his brake to stand still. Their collision takes the last armour point off each of them, leaving Chewbacca as last man standing. He gets one more VP for that, which leaves us with this final situation.

1st	Michael Graystone	Major Tom	4
2nd	Bob Coull	James White	3
3rd	Steve Ham	Chewbacca	2
4th	Don Shailer	The Meteor	1
5th	Joakim Spångberg	Major Mat Mason	1
6th	Jim Reader	Wizard Prang	0

I gave Don fourth place ahead of Joakim because he lasted longer. So although Michael and Bob went out, leaving Steve as the sole survivor, they finish ahead of him on points. We'll round up next month, so do let me know what you thought of this one.

- ✱ New games and start dates:

None! June was very busy, so I didn't get any new games going. This also meant the zine was delayed, and I felt I needed to get the zine out before starting new web games, so this is the first month since I started doing the web games that no new games have started at all. Once the zine is out I am likely to start catching up on the games that are ready to roll. ✱

## PREVIEW

We'll have a new 1870 next time, our third Agricola, and our first game of In the Year of the Dragon.

Canal Mania looks like making a return, currently scheduled for the issue after next. There were different opinions on whether it was a good game for postal play or not, so one thing I aim to do is to check with the players how they want the game to work before we get going.

I have yet to choose the map for the next Railway Rivals game.

Here's the plan for new games due to start in the next issues.

- #166: 1870, Agricola, In the Year of the Dragon
- #167: Canal Mania, Railway Rivals ✱

## BATTLE!

Battle! Has been sitting on the waiting lists for some time now, and it is quite possible that many of you do not know what the game is about. Without this information you can't make an informed decision about whether to play or not, so here is a one-page summary.

Battle! was designed by Richard Ashley, who ran a number of games in Cut & Thrust before that zine laid itself to rest. The game is over 20 years old, having been designed in 1988. Battle! is for six or twelve players, played on a hex grid incorporating walls (solid hex sides) and power points (dots). The starting grid for a six-player game is shown on the right.

Each player begins the game with a single base hex, marked on the map as hexes A to F, and two battle units. The base supplies 10 power points each round, which can be used to build more units, increase an existing unit's attributes, or research new technology.

New technology arrives at the rate of one new level each round. The different levels are announced at the start of the game, so you know when something is going to become available. The order of research levels can vary from one game to the next, making each game slightly different. Typical research levels are Move, Attack, Defence, Range, Conversion, Build, Hover, and so on. You need to research Move and give your units the ability to move before they can leave their starting positions. Similarly, they need to have some Attack attributes before they can start to do any damage to your opponents.

How effective an attribute is depends on how much was spent. It costs 1 point to get to level 1, and a unit with a Move of 1 can move 1 hex a round. It costs another 2 points to get level 2, after which the unit can move 2 hexes, 3 more points to get level 3, and so on.

Occupying a power point hex with a unit increases the amount of power you have to spend in each round. In addition to that, a number of units in open ground will generate one extra power point. The number of units that generate this extra point depends on which version of the rules you refer to, but it is typically 3 or 4.

The aim of the game is to be last man standing. To eliminate another player you need to eliminate his base, which is destroyed when it has taken 10 points of damage.

You have perfect information at the beginning of the round, although the actions of the other players tend to interfere with what you're trying to do, of course. Each round consists of orders for five separate phases: Builds, Construction, Movement, Combat and Conversion (experienced players note - this also varies according to the rules version!).

I've played in a couple of games and found them great fun, as were the games I ran myself. If you fancy a go, let me know and I'll add you to the list. I would prefer to get a 12-player game going, but if I can't then a fourth 6-player game will have to suffice. ♣
